Sardinia

A Greentours Itinerary

Days 1 & 2 Giara de Gesturi

As we touch down at Cagliari's international airport we'll likely see our first wildlife before disembarking - Greater Flamingoes feeding in the brackish lagoons alongside the airport! It is just a forty minute drive up to our agriturismo near the village of Turri and so we'll be settled into our rooms and still have time for a stroll before dinner. Anemone hortensis, Rosy Garlic and the lovely Lathyrus clymenum may be our first flowers in the olive groves and terraces across the road, and we'll soon find our first orchids. The large Ophrys lutea is the commoner of the 'yellow bee' types on this island and it grows near the hotel along with Ophrys incubacea and some fantastic Pink Butterfly Orchids.

The next morning we'll make the short trip to the 'lost world' of the Giara di Gesturi. The landscape is as unexpected as it is strangely beautiful. Outcrops of pinky-black basalt emerge from marshy meadows and vast dwarf Cork Oak woodlands on plateaux that are two thousand feet above sea level. Prehistoric 'nuraghi' indicate man's long association with the region and these structures, rather pyramid-like in appearance, give the Giara an added air of otherworldliness. We'll soon find early-flowering orchids such as Orchis lactea, Romuleas and in places Ranunculus ophioglossifolius. There are many pools and these are the favoured habitat of Tyrrhenean Tree Frogs and Tyrrhenean Painted Frogs. The endemic Pancratium Illyricum will hopefully be in flower nearby.

Days 3 & 6 Sinis

Two thousand hectares of dunes and lagoons is often, rather inaccurately, referred to as Sardinia's 'desert'. There is indeed plenty of sand - and we'll see such plants as Aristolochia navicularis, Silene colorata and corsica, Mattihola Matthiola tricuspidata, Thymelaea tartonraira, Brassica tournefortii, Linaria sardoa and rare Helianthemum caput-felis. Black-winged Stilts and Avocets are amongst a host of waders and on the nearby coast we'll encounter the rare Audouin's Gull. In the salt marshes a highlight will undoubtedly be the strange Cynomorum coccineum, parasitic on various chenopods. The dunes have a very good maritime flora with two species of Dorycnium, Astragalus boeticus and the lovely Barbary Nut joining the more usual medicks, stocks and campions. Under nearby pines we'll find the little green Gennaria diphylla and many very fine orchids. The very beautiful Orchis longicornu is a frequent sight and we'll see Neotinea maculata. Bee Orchids are very varied, and as well as the commoner species we'll encounter Ophrys subfusca and Ophrys morisii.

Day 4 Cala Mosca & the Molentargius Marshes

Cagliari itself has some wonderful wildlife sites practically within the city limits. The little headland of Cala Mosca has a rich flora along its pleasant trails. Shrubby Globularia drapes over banks where pink Weasel's-snout and orange-yellow Fumana thymifolia offer their blooms for inspection. Lovely little Campanula erinus is common and we'll find pretty Convolvulus sicula and Succowia balearica. Small groups of Corsican Finches, now generally split from Citril Finch, frequent this area. Butterflies will already be on the wing and amongst the Clouded Yellows and Cleopatras we'll pick out the occasional Corsican Dappled White. Stretching east from the headland are the Molentargius Marshes, one of Europe's top birding sites with nearly two hundred species recorded. Plentiful waders, gulls, terns and egrets will do a grand job if they can drag our attention away from the huge numbers of Greater Flamingoes. The locals call them the 'Esercito Inglese', the English Army, a reference to their ordered pink ranks!

Day 5 Domusnovas and the Sa Duchessa Valley

The hills and the valleys of the Fluminese provide excellent plant-hunting possibilities. A fine mixture of habitats have plenty of the typical flowers of the area such as Kidney Vetch and Friar's Cowl, Cretan Hounds-tongue and Honeywort, Star Clover and Allium triquetrum, Saxifraga corsica, Cyclamen repandum and Genista corsica and the lovely deep red Asparagus Pea. Southern Festoons are a colourful sight and Sardinian Warblers scold red-eyed from spiny Calicotome. Fabulous furry Mirror Orchids are commonplace and there are Man Orchids, Orchis provincialis and Serapias lingua to keep photographers occupied. This is a remarkable area for bee orchids. As well as widespread Sawfly Orchid there's Ophrys eleonorae with glowing lips of blue and purple, endemic Ophrys chestermannii with large velvety flowers, and the gorgeous grey, purple and pink oval-lipped Ophrys morisii.

Towards the coast lies a pinewood where the impressive flowers of the tongue orchids *Serapias cordigera* will impress. Violet Limodores will be about to flower and in the driest spots blooms the unusual bulb *Simethis mattiazii*. The bizarre latticed Stinkhorn emerges through pine needles

Day 7 Laconi & Ortuabis

As the land rises towards the impressive Monti del Gennargentu the scenery becomes ever more impressive. Partially wooded slopes are decorated with yellow Anemone palmata and the pretty little stars of Romulea requienii. Spring will barely have arrived yet already a bee orchid is blooming up here, the recently described Ophrys ortuabis, a species named after this very locality, as well as Ophrys lepida. Below are terraces with Giant Orchids, Morisia monanthos, Ornithogalum corsicum and Gagea granatellii. Everywhere we'll encounter the

lovely pastel shades of Milky Orchids and unobtrusive little Bumblebee Ophrys. We'll visit the magnificently situated little-visited Nuraghi Adoni. Partially restored it provides a remarkable insight into the little-known stone-age culture that created it. Ophrys eleonorae and Giant Orchids are frequent but it is the endemic Peony Paeonia morisii that offers a particularly breath-taking display.

Day 8 Return to UK

Call 01298 83563 or visit <u>www.greentours.co.uk</u> for the latest trip report from our previous tours to Sardinia. If you would like to ask about any other aspect of this holiday, please call 01298 83563 or email us at enquiries@greentours.co.uk.

To Book a on this Holiday please fill in the booking form which you can download from www.greentours.co.uk (also found in the Greentours brochure) and post to Greentours, 8 Eliot Close, Armitage, Rugeley, W\$15 4UP, UK. Tel +44 (0)1298 83563. After booking your place you'll receive a confirmation letter and a detailed information pack will be dispatched twelve weeks prior to departure. Flower and bird checklists are available.
