The Dolomites

The Best of the Italian Alps

A Greentours Itinerary

Day 1 Arrive Venice and transfer to Claut

As we rise up into the mountains the beech and hornbeam forests soon give way to flower-filled meadows and spruce forests, and we start to see the wonderful limestone battlements of the higher mountains. It'll take us under two hours from Venice Airport to reach the little settlement of Claut.

En route to the Dolomiti Friulane we'll stop at a leafy lane near Vajont where the myriad flowers and butterfliers of northeast Italy will immediately make quite an impression on us. We'll soon encounter numerous Dark Red Helleborines as well as Lesser Butterfly Orchids amongst a host of fine woodland flowers such as attractive Teucrium montanum, Centaurea jacea, Hieracium staticifolium, Bupthalmum salicifolium, Peucedanum venetum, Verbascum chaixii austriacum, Valeriana wallrothii, Swallowwort, and the ever-lovely Wood Pink. Apollos float along dry slopes covered in their foodplants, stonecrops, and we'll also see Pearly Heath, Marbled White, Large Wall Brown, and Woodland Brown. We've a decent chance of encountering the impressive Poplar Admiral here. Spiked Bellflowers are an impressive sight, and there's more orchids in the shape of Fly Orchid and Red Helleborine too! A little further along we'll stop at a site for the very rare nemoralis race of Fen Orchid. This robust form is found in woodland rather than fens and is known from only half a dozen sites in the northeast Italy.

Days 2 & 3

The Dolomiti Friulane: Cimoliana & Passo Duran

The Dolomiti Friulane is a very rich area on the edge of Dolomites' main ranges. The landscape is sublime with limestone pinnacles rising above woodlands and meadows full of often beautiful flowers and butterflies. Cyclamen purpurascens populates woodlands where we'll encounter some lovely Aquilegias, bright vulgaris, lustrous atrata and the lovely regional endemic Aquilegia einseleana. Monotropa hypopitys hides in the shade of beeches where we'll also find orchids such Dark Red Helleborine, Twayblade and Red Helleborine. Three fine black and white butterflies will hold centre stage, White Admiral, Southern White Admiral and the elegant Hungarian Glider, and in glades we'll see Silver-washed Fritillary, Wood White and the Woodland Brown. Willow Gentian may just be opening its blue trumpets along woodland rides where we'll also encounter the Lady's Slipper Orchid – you'll probably only see one of these two in flower as they rarely bloom at the same time! The distinctive pink Crepis froelichiana dinarica, an endemic subspecies, blooms with

Anemone trifolia and this is a good area to see Duke of Burgundy Fritillaries and we're likely to encounter a good number today.

Large Chequered Skipper and False Heath Fritillary fly in meadows dotted with Dactylorhiza fuchsii and both Fragrant and Short-spurred Fragrant Orchids, these across the road from our hotel. Early morning is a good time to look for Roe Deer or Chamois in these same meadows.

A little higher up we'll find mountainsides covered in a rich tapestry of flowers such as Cerastium subtriflorum, Petrorhagia saxifraga, Dianthus sternbergii, Silene saxifraga Arenaria huteri, Sedum rupestre and Gentiana utriculosa, whilst rocky outcrops are home to Senecio abrotanifolius, Centaurea dichroantha, Edelweiss and the wonderful Devil's Claw. A classic amongst alpine plants, the Devil's Claw nestles in deep limestone crevices, its amazing pink and blue claws in flowerheads the size of a child's fist. Another highlight will be the fine yellow day lily, Hemerocallis lilioasphodelus, endemic to just a few sites in the area.

During the afternoon of Day 3 we'll make our way over Monte Pelmo to the Val Pettorina, just an hour to the northwest, our home for the remainder of the holiday. We have chosen this base with great care so as to ensure minimal travelling times to some of the finest flower sites in the region. Within half and hour's drive of our hotel are the superb alpine meadows, forests and crags of the ridge along the top of the Val d'Ampezzo, and the exquisite Monte Pelmo. Fine alpine turf just yards from the road is covered in a multi-coloured floral display rivalling that found anywhere in Europe. Beautiful sky-blue Campanula barbata mixes with the dark red wine coloured local variant of Black Vanilla Orchid, Nigritella rhellicani and the brilliant blues of the trumpet gentians, Gentiana acaulis and Gentiana clusii. Mountain White Orchid, Frog Orchid and Pink Globe Orchid also grow in as fine a mixture of alpine orchids as you could wish to see. Wet patches hold bright red-pink Dactylorhiza alpestris, butterworts, deep blue flowers of the rare Gentiana bayarica and red-black Pedicularis recutita. while waving in the breeze are the candyfloss heads of cotton grass. Gorgeous Apollos float over these gentle slopes and dark ringlets erupt from under our feet as we walk. Many species of these difficult-to-identify butterflies are found in the area including Woodland, Blind, Common Brassy and Almond-eyed Ringlets. The rather prosaically named Alpine Blue is common here; its distinctive underside may come into focus as we peer closely at the pretty flowers of Androsace alpina. The loud calls of Alpine Choughs echo from the surrounding cliff faces, competing with the piercing whistles of Alpine Marmots which are so common here that we should be careful to avoid putting a foot down one of their holes!

Day 4 Passo di Giau & Posalz

Beautiful alpine turf littered with colourful flowers stretches gently up to the bulk of the Nuvolau, a huge buttress sitting atop the ridge. There are stunning views down to

Cortina in the valley below. Initially the turf is on acidic soils and we'll find abundant Alpine Pasque Flowers and Geum montanum as well as a few Androsace obtusifolia. Amid many Trumpet Gentians are Ranunculus montanus and Ranunculus kuepferi, and we'll see Frog Orchids, Daphne striata, Ajuga pyramidalis and Veronica alpina. Alpine Toadflax, a fabulous mosaic of purple and orange, grows with the bright golden-yellow of Potentilla aurea and the intense pink cushions of Moss Campion, providing an irresistible palate for the photographer!

Reaching the limestone the bright pink Alpenroses change from ferrugineum to hirsutum, while further along we'll find the Creeping Azalea and the stunning Dwarf Alpenrose. The diminutive Bird's-eye Primrose is common and we shall find Primula halleri and maybe the bright yellow Primula auricula will still be in bloom. Cliffs are home to some of the finest of all alpine plants. Reddish-pink Potentilla nitida, an unusual colour for a cinquefoil, grows amidst some lovely saxifrages. Encrusting bluegrey rosettes growing flush against rock faces with sprays of delicate creamy flowers are Saxifraga caesia, and we shall also find Saxifragas crustata, aizoides and the beautiful oppositifolia amongst others. Decorating mats of Dryas octopetala are Achillea clavennae, Mossy Sandwort, Pedicularis rosea, Paederota bonarota, Phyteuma sieberi, Viola biflora, Draba dubia, Valeriana saxatilis, and Helianthemum alpestre. The slopes here are dotted with Pinus cembra and among them we'll see Ranunculus hybridus and wet flushes covered in Bird's-eye Primrose.

We shall wander along forest tracks where Serins, Crossbills and Crested Tits are common. Gamebirds are a feature of the local forests, but we shall be lucky to see any of Hazelhen, Black Grouse or Capercaillie. These woods have a very fine flora too - the almost Black spikes of *Phyteuma zahlbruckneri* and the dark wine-coloured flowers of *Aquilegia atrata* are two particularly noteworthy species. The mossy forest floor is home to the lovely One-flowered Wintergreen and growing with them are two unusual orchids, the Coralroot Orchid and the Single-leaved Bog Orchid! The beautiful Titania's Fritillary floats around meadows and woodland glades near the hotel and here we shall see the greatest variety of butterflies, from Nickerls' and False Heath Fritillaries, to Scarce Coppers, Large Blues, Amanda's Blues and the plentiful Alpine Heath.

Day 5 Marmolada & Sottoguda

To the west is the magnificent glaciated peak of Marmolada, rising to some 11,000 feet. We will spend a day exploring the rich slopes on either side of the beautiful Lago de Fedaia. The views across the lake to Marmolada's glacier, only a couple of thousand feet above us to the south, are really spectacular. The slopes by the lake are covered by a lovely mixture of *Rhododendron hirsutum*, the delicate Windflower or Mountain Avens and Alpine Butterwort, and there's even a few Coralroot Orchids. Impressive shows of Lesser Wintergreen and the gorgeous blue and white flowers of Alpine Clematis grow amongst this colourful display. For those that wish we can catch

a chairlift up to the edge of the glacier. What appears to be barren limestone rock from below, not so different in colour from the glacier, is, on closer inspection, decorated with some fine alpine flowers. As we ascend we'll pass Silene acaulis, Gentiana clusii and Gentiana orbicularis. Little purple patches are revealed to be the pretty little Thlaspi rotundifolia whilst clusters of blue are the rare Gentiana terglouensis. Other tiny high alpine gems include Arabis caerulea, Arabis bellidifolia, Arabis alpina, Saxifraga oppositifolia, Saxifraga sedoides and Petasites paradoxus. Small Tortoiseshells are typically a high altitude butterfly here and we might also see Alpine Grizzled Skipper too.

Valleys below the chairlift contain some of the more spectacular flowers and butterflies the Dolomites has to offer. One particular meadow has swathes of huge Martagon Lilies, Orange Lilies and the delicate white bells of St Bruno's Lilies. Yellow Alpine Leeks mix with pink Alpine Sainfoin, white and mauve Alpine Milk-Vetch and masses of the Globeflowers to magical effect. Rocks here are home to the uncommon Short-spurred Fragrant Orchid and we may also see Small White Orchid and *Primula halleri*. The Moonwort Ferns here are exceptionally large. Butterflies include various skippers and ringlets as well as the beautiful Asian, Marsh and Lesser Marbled Fritillaries.

Later in the day we'll visit the gorge at Sottoguda. This is another chance to see the enigmatic Devil's Claw. The same cliffs are festooned with Saxifraga crustata, together with fine Paedarota bonarota, Kernera saxatilis and Rhamnus pumila. Beautiful waterfalls cascade down the sides of the gorge and we'll likely find the scarce fern Cystopteris montana growing around them and Ladies Slipper Orchids too.

Day 6 The Val San Lucano

Today will see us lower in the mountains amongst woodlands and meadows, the latter in places bright with fabulous shows of Orange Lilies. Both Oak Fern and Beech Fern decorate the woodland floor where Herb Paris, Chrysosplenium alternifolium, Streptopus amplexifolius and the lovely One-flowered Wintergreen blooms. On boulders we'll find Yellow Wood Violets and Alpine Clematis. On the nearby river gravels are Papaver aurantiacum, Parnassia palustris, Gypsophila repens, Pritzelago alpina, Saxifraga rotundifolia. and the very local endemic crucifer Rhizobotrya alpina. There's also almost black-flowered Phyteuma ovatum and extremely robust forms of Campanula latifolia.

We'll take our picnic at a lovely spot by a lake in the San Lucano valley. Lonicera alpigena and Dark Red Helleborine flower under very impressive sheer cliffs that rise up on each side of the narrow verdant valley whilst Arran Browns and Woodland Brown will be flying. Rising up over the Duran Pass we'll find roadsides lined with striking pink Linum viscosum and here we'll search for the uncommon Thor's Fritillary.

Day 7 Fedaia

Today we'll visit the Refugio at Fedaia. This has staggering views across to the Marmolada and a complex series of peaks beyond. Right by the Refugio the predominantly igneous rock outcrops are home to Leucanthemopsis alpina, Draba siliquosa, Draba aizoides, Arabis alpina, Linaria alpina, Androsace obtusifolia, and Alpine Toadflax. Gentiana brachyphylla is sure to be a highlight, though it might quickly be outshone by that most beautiful and charismatic of alpine plants, the King of the Alps, which is extremely numerous up here. Growing on the same acidic rocks are much Saxifraga exarata, Minuartia recurva, Silene exscapa and Polygala alpina. Alpine Choughs are numerous and we'll see plenty of Water Pipits and Black Redstart as well as a few Alpine Accentors.

The curious Spotted Gentian is common here. Other classic alpines include much superb Geum reptans and Ranunculus glacialis. Saxifraga oppositifolia carpets gravels with purple flowers and we'll also see Saxifraga depressa, Astragalus alpinus, Alpine Clubmoss, Fir Clubmoss, Snowdon Lilies, fine cushions of pink Androsace alpina and butter-yellow Androsace vitaliana. Chamois graze alpine turf dotted with abundant Early Purple Orchids and numerous Alpine Pasque Flowers. Dewy Ringlets, Mountain Green-veined Whites, and Woodland Ringlets fly above cascades of bright pink Primula minima. By snowmelt we'll encounter the delicate Soldanella pusilla whilst open tundra has Minuartia sedoides in fine form, as well as Trumpet Gentians and Net-leaved Willow.

Day 8 Fontanafredda & Staulanza

We'll spend the day exploring forested tracks at mid-altitudes. Highlights will include Lesser Twayblade, Lady's Slipper Orchid, One-flowered Wintergreen, Verticillate Lousewort, Dragonmouth and Anemone trifolia.

As we enjoy magnificant views of Pelmo and Civetta we'll pass through some large open meadows boasting a great floral variety including Globeflowers, the very attractive orange Crepis aurea, Small White Orchids, and Arnica montana. Butterflies include Bright-eyed Ringlet, Large Blue and Pearl-bordered Fritillary. Along the wooded sections of the track we'll find Clematis alpina, much Phyteuma orbiculare and some fine Alpine Sow-thistle, while Nutcrackers are a frequent sight.

One glorious flowery slope supports lots of *Gentianella germanica*, Alpine Asters, a good number of Burnt-tip Orchids, fine *Campanula barbata*, beautiful *Traunsteinera globosa*, Chives and Rock Soapwort. Black Vanilla Orchids are rather common in short turf and there's also *Pedicularis elongata* in flower. Wet flushes are clothed in many Alpine Marsh Orchids and the cottony heads of *Eriophorum angustifolium*.

Our last stop of the day will see us enjoying a nice colony of Marsh Helleborines and here there are a few plants of Limestone Woundwort too.

Day 9 Falzarego, Valparola & Andraz

The Falzarego Pass, beloved of luxury car photo shoots, is a glorious spot where we'll see sheets of Rhodothamnus chamaecistus in flower and rock gardens decorated with special alpines such as brilliant Gentiana terglouensis, delicate Saxifraga androsacea, Anemone baldensis, Ranunculus hybridus, Armeria alpina, and Thlaspi alpestre. Striking blue Gentiana bavarica mixes with Chives and many fine Pedicularis rostratocapitata by the shores of a small lake. Boulders here have some fine Edelweiss and this is a spot where we'll be able to find the very special little orchid Chamorchis alpina flowering amid much Papaver aurantiacum. We'll visit Andraz Castle, surrounded by fine meadows which are home to many marmots as well as a good colony of Large Blues.

Day 10 Transfer to Venice and Depart for the UK

One last chance at enjoying the local meadows before we depart for Venice and our flight back to the UK.

Call 01298 83563 or visit <u>www.greentours.co.uk</u> for the latest trip report from our tours to the Dolomites. If you would like to ask about any other aspect of this holiday, please call 01298 83563 or email us at enquiries@greentours.co.uk.

To Book a on this Holiday please fill in the booking form which you can download from www.greentours.co.uk (also found in the Greentours brochure) and post to Greentours, 8 Eliot Close, Armitage, Rugeley, WS15 4UP, UK. Tel +44 (0)1298 83563. After booking your place you'll receive a confirmation letter and a detailed information pack will be dispatched twelve weeks prior to departure. Flower, bird and butterfly checklists are available.
