

Two Malaysian Mountains

Nothing Mayhem

A Greentours trip report

28th February to 13th March 2026

Led by Phil Benstead

Daily Report

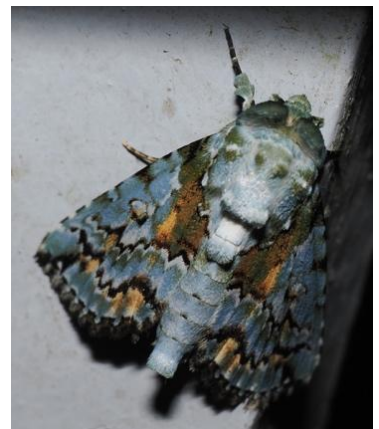

28/2 arrival and the drive up to Fraser's Hill

The team arrived on time in Kuala Lumpur and Phil was there to pick up. The van took some time to arrive with us and was rather small. Luckily Joe was already at Frasers Hill but we had to make alternate arrangements to get back to the airport later in the trip. On arrival at the villa, Stephen and his family extended their hospitality to us and we settled into our rooms. Our first meal was fish-and-chips but Stephen's wife proved to be an excellent chef for good Malaysian staples during our stay.

As dusk fell we acquainted ourselves with the pitviper (*Trimeresurus sabah*) living in the rafters under the tree house. Although the moon was waxing to be full (and Stephen was pessimistic...), we had a great and rather mind-boggling first night; *Monosyntaxis holmanhunti*, *Ourapteryx claretta*, *Plutodes flavescens* and a host of other species

were recorded. Our only *Risoba calaina* (pictured right) of the tour was well-received. It was difficult to judge the precise number of moth taxa we saw during our many visits to the lights during the night (2-300?). Any more moths would have been very confusing on the first night. Other non-moth highlights during our nights here included some great longhorn beetles and noisy (and rather annoying) cicada spp.

1/3 Fraser's Hill

The nothing continued to first light, four phases of arrival and departure being noted during the whole session. If you believed moths are attracted to light and stay put until first light before this session you were quickly disabused. Repeated visits during the night were the only way to maximise the number of species encountered.

After sleeping through the morning we took a walk after lunch. It was rather quiet today but we did find a nice terrestrial orchid (*Anoectochilus reinwardtii*, right). A small troupe of dusky langur watched from telegraph poles as we trudged back to base.

The night time mothing was exciting, would we just see a whole lot of species from the previous night? The answer was amazingly no. We reckon that at least 65% percent of our haul during the sessions during the night were novel. Long may it continue. We did well with the common sphingids of the site today and the very large geometrid *Amblycha* was present in small numbers. A non-moth highlight for Phil and Joe was a juvenile Butler's wolf snake (*Lycodon butleri*).

2/3

Fraser's Hill

Nothing continued to dawn with the larger stuff arriving just after first light as usual but in very small numbers this morning. Phil slept through breakfast and the morning but various walks were taken by those who were awake and produced some nice birds on the road that snakes below our garden. Phil shambled out for lunch.

A local walk in the afternoon was better, in line with peoples

experience this morning, with looks at silver-breasted broadbill, red-headed trogon, Mugimaki flycatcher and Siberian thrush and a small supporting cast that included golden babbler and the splendidly plush black-throated sunbird. The latter stealing nectar from the purple flowers of a vine on a 'sunny' corner.

The evening mothing session started with our biggest rain shower to date and much needed it was. The forest up on the mountain was very dry. At the height of the rain a huge atlas moth flew past slapping Phil in the face but not stopping.

3/3

Fraser's Hill

Many of us remained active through the small hours and into a pre-dawn session.

Phil drove the team down into town after breakfast and they went for a guided walk with Durai – a local guide. They reported a nice gentle walk that produced some nice birds including Malayan partridge and views of collared owlet.

A night walk after the first moth walk-around produced another *Trimeresurus sabahi* and Jenny found us a superb gecko (*Cyrtodactylus australotitiwangsaensis*). An excellent *Magnum*™ moment. Malaysian purple femur tarantulas (*Coremiocnemis hoggi*) peered between their furry legs from their holes in roadside banks. A

cooler moth session this night with the fewest new additions but still, of course, with some excellent moth species.

4/3

Fraser's Hill

Although the night had been rather quiet the pre-dawn check on the lights produced a good number of new moths including our only *Macrotilix* (pictured below right) of the trip and our first moon moth (*Actias maenas*, see left).

Phil did a reduced night to allow for a drive this morning. We drove down to the Gap and checked out a waterfall on the Raub road. It was warm down here but the invertebrates were flying. An ooze from a dead and very rotten macaque attracted some mud-puddling butterflies including Malayan

zebras (*Graphium delessertii*), veined jay (*Graphium chironoides*) and four-bar swordtails (*Graphium agetes*). Harder to photograph an elusive *Papilio nephelus*.

The nearby stream had some nice odonates including *Coeliccia didyma* and *Orthetrum triangulare*. After lunch back in town we headed down to the nearby waterfall. Rain fell during this session. The walk down produced a nice butterfly – pallid faun (*Melanocyma faunula*). Other butterflies and a few tiger beetles followed. Rowena secured images of *Terinos terpander* and *Eurema sari* on the way back to the vehicle.

Another night of nothing ensued, as we settled into the routine of our nocturnal life. The early part of the night was disrupted by a brief thunderstorm which pinched off the arrival of new moths.

5/3

Fraser's Hill and back down to Sepang

The pre-dawn session before breakfast was quieter than normal with no big moths coming in. We had a free morning before one last lunch at the Chinese restaurant in town and then took to two vehicles for the transfer back to KL. Dinner in a bustling muslim restaurant nearby and then blessed

sleep for the whole night!

6/3

travel to Kota Kinabalu

A day taken up with our relocation to Kota Kinabalu. We arrived at the airport in plenty of time and loafed about until it was time to go to the gate. The plane left on time and two-and-a-half hours later we were touching down in KK. A fleet of taxis transferred us to the nearby seaside hotel and we settled in to our rooms. The bad news was the

hotel restaurants were all booked up by non-residents making the most of the iftar buffet arrangement during ramadan. We checked out the grounds for wildlife individually or in small groups and found some good birds including members of the introduced population of blue-naped parrot. The hotel pond had the recently resurrected damselfly *Pseudagrion siamense*. For dinner we had a 15-minute walk down the road to a seafood

restaurant the produced a decent enough meal, although inevitably largely seafood based. We staggered back for another uninterrupted sleep.

7/3 travel to Trus Madi

Plenty of time for breakfast this morning before we filled in indemnity forms and took to two 4WDs for the drive up onto the slopes of Gunung Trus Madi. En route we stopped at the top of the pass at Gunung Alab for a comfort break and to buy water and fried bananas. Next stop was the Rafflesia reserve. More paperwork here before re-locating to a nearby car park area to pick up our guides for a short walk chasing *Rafflesia pricei*. Two 'fresh' individual flowers were available today as well as buds and a dark ten-day old flower. The supporting cast was rather limited in the middle of the day but a few invertebrates and ginger flowers caught our attention.

Driving on we had a simple lunch in Tambunan as the camp was now too distant for anything but a very late lunch. The road up to the camp was in mostly good condition but definitely less comfortable than tarmac! Up we went until eventually we reached the camp, bustling with life and with its incredible battery of moth sheets and associated lights. We settled into our basic rooms and looked forward to the nights ahead.

Our first session was nothing but astonishing for the sheer number of moths and other invertebrates attracted to the nine lights that were lit this night. The number of species recognisable from Fraser's Hill was surprisingly low and we were kept busy not just by the distance between traps but by the enormity of trying to photo-document every species. Two rounds of the lights took up the first five hours of darkness and then most opted for a break until 0300-0400 for another round before dawn. Phil had a sneaky Javan civet munching on cicadas on one quiet light. It was shy but many of us managed to spot him over the ensuing nights. During this session hawk-moths and silk moths were very well represented and the morning round

produced some much-anticipated moths including *Apsarasa radians*. As the gibbon chorus built at dawn most of us headed to bed.

8/3 Gunung Trus Madi

We worked the sheets through the night bagging the much-wanted scribbly *Eucyclodes gavissima* (pictured left) amongst a host of other species. Whilst some slept others somehow found the energy this morning after the very early start to get out in the field again. On the sheets the moths attracted black-and-yellow broadbill, narcissus flycatcher, red-bearded bee-eater, ashy drongo and brown barbet. They took the track beyond the generator and reported some nice birds including Diard's trogon, blue-and-white or Zappey's flycatcher, wreathed hornbill, red-billed malkoha, bornean leafbird and Bornean bulbul.

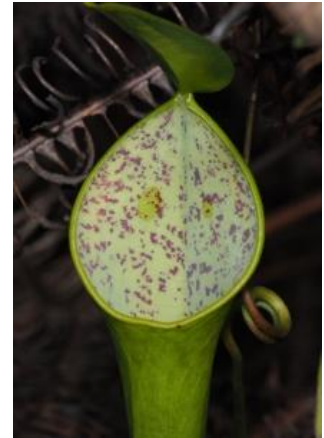

Some light birding before the moth session started in the evening produced Asian brown flycatcher, velevet-fronted nuthatch and the commonplace ashy drongo.

9/3

Gunung Trus Madi

The pre-dawn moth session melded seamlessly into a dawn filled with the sound of duetting North Borneo gibbons. Large-tailed nightjars cruised over the lights at the top of the hill and a grey nightjar appeared on the ground on the ridge for the lucky few.

After breakfast we took to the cars to drive to a nice bank of *Nepenthes*, both large *stenophylla* and more modest *reinwardtiana* being photographed. Next stop was a largely flower-free visit to the orchid garden, that was brightened up by an invisible, calling Bornean banded pitta. Moving on to a steep slope the intrepid few followed the rangers down to an area with several clumps of *Rafflesia tengku-adlinii* (a small species), sadly we found three flowers that were very old and a lot of buds, one of which was very slowly thinking about flowering.

Driving further down the access track we checked out a pond close to the road. Here we connected with a few odonates; *Camacinia gigantea*, *Neurothemis fluctuans* and *Tetrathemis hyalina*. We checked roadside rivulets on the way back getting a nice *Troides andromache* (pictured left).

After lunch Phil and the drivers went to recce a track that dropped down into lower and warmer forest, butterflies and other invertebrates were more abundant and we decided to bring the team back in the morning.

A short downhill nightwalk was rather unproductive but we had a few *Haaniella* phasmids, a rapid mouse, sleeping macaques and a few roosting diurnal passerines.

The moth night was glorious with incredible numbers of moths and some great species added to our tally before midnight.

10/3

Gunung Trus Madi

The pre-dawn session was amazing. At 0600 Phil concentrated on getting images of the mystery nightjars and succeeded – they were just worn grey nightjars in the end... Those who had time to get to the lower lights were rewarded with four over-lapping moon

moths of two species and a death's head hawkmoth (*Acherontia lachesis*)! The upper lights were full of new things too, as we raced against the clock and the waiting predators.

After breakfast we said our goodbyes to Joe, whose flight back to Colombia had been badly affected by the start of conflict in the Middle East. Most of us dozed through until lunch and then we took to the cars to rock and lurch down into the nearest valley to get a bit lower. It was warmer but the great mothing weather continued with overcast conditions and low cloud, thunder rumbled but did not deliver. We did find some new butterflies and encountered a nice canopy flock of birds.

11/3 Gunung Trus Madi

After the pre-dawn moth session we rested up as usual. After lunch we walked up to the *Nepenthes reinwardtiana* display above the top light. Here we had a quick photo session with a moon moth that had been stashed there earlier by Michael. The big surprise came on the way back when Jenny found us a single male Jambu fruit-dove – nice one!

More mothing ensued after dinner as usual.

12/3 Gunung Trus Madi

More moth mayhem in the early morning session and more sleep in the morning. An afternoon walk after lunch netted some nice birds including a catch up for those who had not seen Jambu fruit-dove previously, when Rowena found us a single immature bird perched inconspicuously near a low fruiting tree. Earlier Jenny had found a small family party! A ferruginous flycatcher here was also nice.

13/3 to Kota Kinabalu via Gunung Alab bird hide

The drivers insisted on leaving early because they were worried about traffic but it transpired they were probably more interested in getting home! The trip to the airport was without incident and we arrived very early for the 1800 flight to be taken by the team. Apologies and I know better how to manage this driver team now...

En route we stopped to have a quick and free look at the bird hide on the pass at Gunung Alab. Here in the very short time available we connected with a number of great bird species including short-tailed magpie, mountain wren-babbler, grey-throated babbler, white-browed shrike-babbler and black-capped white-eye.

Lepidoptera recorded in Malaysia between 28th February and 13th March 2026

This list is the species photographed by Phil B during the tour, those marked ‡ recorded by Joe T and may still lie unidentified in Phil's photographic collection. Identification of many taxa from photographs is problematic and this list is not final.

You can browse Phil's photo record of the moths on the tour by accessing:

https://www.inaturalist.org/observations?d1=2026-02-28&d2=2026-03-31&place_id=7155&subview=table&taxon_id=47157&user_id=philbenstead&verifiable=any

You can look at Joe's collection at: https://www.inaturalist.org/observations?d1=2026-02-28&d2=2026-03-31&place_id=7155&subview=table&taxon_id=47157&user_id=desertnaturalist

There are still many images in the above links that are unattributed to species, if you feel like adding your own identifications and comments then please do by joining iNaturalist!

Birds recorded in Peninsula Malaysia between 28th February and 5th March

Cattle egret	<i>Bulbulcus ibis</i>	Recorded.
Asian openbill	<i>Anastomus oscitans</i>	Kuala Lumpur.
Bathawk	<i>Macheiramphus alcinus</i>	One for Phil at Frasers Hill, perched briefly on the transmitter tower before continuing to hunt in the gloaming one evening.
Crested serpent eagle	<i>Spilornis cheela</i>	Frasers Hill.
Malayan partridge	<i>Arborophila campbelli</i>	The team saw this on their guided walk with Durai.
Red junglefowl	<i>Gallus gallus</i>	Kuala Lumpur.
White-breasted waterhen	<i>Amaurornis phoenicurus</i>	Recorded.
Red-wattled lapwing	<i>Vanellus indicus</i>	Kuala Lumpur.
Mountain imperial pigeon	<i>Ducula badia</i>	Frasers Hill.
Rock pigeon	<i>Columba livia</i>	Recorded.
Little cuckoo dove	<i>Macropygia ruficeps</i>	Frasers Hill.
Large hawk cuckoo	<i>Cuculus sparveroides</i>	Frasers Hill.
Common koel	<i>Eudynamys scolopacea</i>	Kuala Lumpur.
Green-billed malkoha	<i>Phaenicophaeus tristis</i>	Frasers Hill.
Lesser coucal	<i>Centropus bengalensis</i>	Recorded.
Mountain scops owl	<i>Otus spilocephalus</i>	One for Jenny and Phil during a nightwalk at Frasers Hill.
Collared owlet	<i>Glaucidium brodei</i>	Seen during the walk with Durai at Frasers Hill.
Brown wood owl	<i>Strix leptogrammica</i>	Frasers Hill - one feeding on moths at night.
Plume-toed swiftlet	<i>Collocalia affinis</i>	Frasers Hill.
needletail sp.	<i>Hirundapus</i> sp.	Frasers Hill.
Silver-rumped swift	<i>Rhaphidura leucopygialis</i>	Frasers Hill.
Fork-tailed swift	<i>Apus pacificus</i>	Frasers Hill.
Asian palm swift	<i>Cypsiurus balasiensis</i>	Frasers Hill.
Red-headed trogon	<i>Harpactes erythrocephalus</i>	Occasional at Frasers Hill.
Collared kingfisher	<i>Halcyon chloris</i>	Kuala Lumpur.
Red-bearded bee-eater	<i>Nyctornis amictus</i>	Seen in the garden at Frasers Hill on arrival but sadly not thereafter.
Fire-tufted barbet	<i>Psilopogon pyrolophus</i>	Frasers Hill.
Red-throated barbet	<i>Megalaima mystacophanos</i>	Frasers Hill.
Black-browed barbet	<i>Megalaima oorti</i>	Frasers Hill.
Maroon woodpecker	<i>Blythipicus rubiginosus</i>	Frasers Hill.
Silver-breasted broadbill	<i>Serilophus lunatus</i>	Frasers Hill.
Barn swallow	<i>Hirundo rustica</i>	Recorded.
Pacific swallow	<i>Hirundo tahitica</i>	Recorded.
Malayan cuckoo-shrike	<i>Coracina larutensis</i>	Frasers Hill.
Grey-chinned minivet	<i>Pericrocotus solaris</i>	Frasers Hill.
Blue-winged leafbird	<i>Chloropsis cochinchinensis</i>	Frasers Hill.
Black-crested bulbul	<i>Pycnonotus melanicterus</i>	Frasers Hill.

Stripe-throated bulbul	<i>Pycnonotus finlaysoni</i>	Frasers Hill.
Yellow-vented bulbul	<i>Pycnonotus goiavier</i>	Frasers Hill.
Ochraceous bulbul	<i>Criniger ochraceus</i>	Frasers Hill.
Lesser racket-tailed drongo	<i>Dicrurus remifer</i>	Frasers Hill.
Black-and-crimson oriole	<i>Oriolus cruentus</i>	Frasers Hill.
House crow	<i>Corvus splendens</i>	Kuala Lumpur.
Large-billed crow	<i>Corvus macrorhynchus</i>	Frasers Hill.
Sultan tit	<i>Melanochlora sultanea</i>	Frasers Hill - regular at the lights at Frasers Hill.
Buff-breasted babbler	<i>Trichastoma tickelli</i>	Frasers Hill.
Golden babbler	<i>Stachyris chrysaea</i>	Frasers Hill.
Grey-throated babbler	<i>Stachyris nigriceps</i>	Frasers Hill.
Chestnut-capped laughingthrush	<i>Garrulax mitratus</i>	Frasers Hill.
Silver-eared mesia	<i>Leiothrix argentea</i>	Frasers Hill.
White-browed shrike- babbler	<i>Pteruthius flaviscapis</i>	Frasers Hill.
Black-eared shrike-babbler	<i>Pteruthius melanotis</i>	Frasers Hill.
Mountain fulvetta	<i>Alcippe peracensis</i>	Frasers Hill.
Long-tailed sibia	<i>Heterophasia picaoides</i>	Frasers Hill.
White-bellied yuhina	<i>Yuhina zantholeuca</i>	Frasers Hill.
Magpie robin	<i>Copsychus saularis</i>	Frasers Hill.
White-rumped shama	<i>Copsychus malabaricus</i>	Frasers Hill.
White-crowned forktail	<i>Enicurus leschenaulti</i>	Frasers Hill.
Siberian thrush	<i>Zoothera sibirica</i>	Single at Frasers Hill.
Arctic warbler	<i>Phylloscopus borealis</i>	Frasers Hill.
Eastern crowned warbler	<i>Phylloscopus coronatus</i>	Frasers Hill.
Dark-necked tailorbird	<i>Orthotomus atrogularis</i>	Frasers Hill.
Rufescent prinia	<i>Prinia rufescens</i>	Raub Road.
Asian brown flycatcher	<i>Muscicapa dauurica</i>	Frasers Hill.
Mugimaki flycatcher	<i>Ficedula mugimaki</i>	Frasers Hill.
Rufous-browed flycatcher	<i>Ficedula solitaria</i>	Frasers Hill.
Little pied flycatcher	<i>Ficedula westermanni</i>	Frasers Hill.
Hill blue flycatcher	<i>Cyornis banyumas</i>	Frasers Hill.
Spotted fantail	<i>Rhipidura perlata</i>	Frasers Hill.
Black-naped monarch	<i>Hypothymis azurea</i>	Frasers Hill.
Grey wagtail	<i>Motacilla cinerea</i>	Frasers Hill.
White-breasted woodswallow	<i>Artamus leucorhynchus</i>	Kuala Lumpur.
Javan myna	<i>Acridotheres javanicus</i>	
Black-throated sunbird	<i>Aethopyga saturata</i>	Frasers Hill.
Streaked spiderhunter	<i>Arachnothera magna</i>	Frasers Hill.
Scarlet-breasted flowerpecker	<i>Prionichilus thoracicus</i>	Frasers Hill.
Fire-breasted flowerpecker	<i>Dicaeum ignipectus</i>	Frasers Hill.
Everett's white-eye	<i>Zosterops everetti</i>	Frasers Hill.
Tree sparrow	<i>Passer montanus</i>	Kuala Lumpur.

Birds recorded in Sabah between 5th to 13th March

Cattle egret	<i>Bubulcus ibis</i>	Recorded.
Little egret	<i>Egretta garzetta</i>	Kota Kinabalu.
Pacific reef egret	<i>Egretta sacra</i>	Kota Kinabalu.
Brahminy kite	<i>Haliastur indus</i>	Kota Kinabalu.
White-bellied fish-eagle	<i>Haliaeetus leucogaster</i>	Kota Kinabalu.
Crested serpent-eagle	<i>Spilornis cheela</i>	Recorded.
Blyth's hawk-eagle	<i>Spizaetus alboniger</i>	Single adult on Trus Madi.
[Great argus]	<i>Argusianus argus</i>	Heard frequently on Trus Madi.
White-breasted waterhen	<i>Amaurornis phoenicurus</i>	Occasional whilst driving.
Wood sandpiper	<i>Tringa glareola</i>	Rice paddies at base of Trus Madi.
Common sandpiper	<i>Actitis hypoleucos</i>	Kota Kinabalu.
Black-winged stilt	<i>Himantopus himantopus</i>	Rice paddies at base of Trus Madi.
Pink-necked green pigeon	<i>Treron vernans</i>	Kota Kinabalu.
Jambu fruit dove	<i>Ptilinopus jambu</i>	A single male one day and a family party on another at Trus Madi.
Green imperial pigeon	<i>Ducula aenea</i>	Kota Kinabalu.
Pied imperial pigeon	<i>Ducula bicolor</i>	Kota Kinabalu.
Rock pigeon	<i>Columba livia</i>	Kota Kinabalu.
Spotted dove	<i>Streptopelia chinensis</i>	Kota Kinabalu.
Zebra dove	<i>Geopelia striata</i>	Kota Kinabalu.
Emerald dove	<i>Chalcophaps indica</i>	Trus Madi.
Blue-naped parrot	<i>Tanygnathus lucionensis</i>	Kota Kinabalu.
[Indian cuckoo]	<i>Cuculus micropterus</i>	Heard at Trus Madi.
Red-billed malkoha	<i>Zanclostomus javanicus</i>	Trus Madi.
Black-bellied malkoha	<i>Phaenicophaeus diardi</i>	Trus Madi
Chestnut-breasted malkoha	<i>Phaenicophaeus curvirostris</i>	Trus Madi.
Raffle's malkoha	<i>Phaenicophaeus chlorophaeus</i>	Trus Madi.
Greater coucal	<i>Centropus sinensis</i>	Recorded.
Lesser coucal	<i>Centropus bengalensis</i>	Recorded.
Brown wood-owl	<i>Strix leptogrammica</i>	Trus Madi.
Grey nightjar	<i>Caprimulgus jotaka</i>	Trus Madi.
Large-tailed nightjar	<i>Caprimulgus macrurus</i>	Trus Madi.
Glossy swiftlet	<i>Collocalia esculenta</i>	Recorded.
House swift	<i>Apus nipalensis</i>	Kota Kinabalu.
Whiskered tree-swift	<i>Hemiprocne comata</i>	Trus Madi.
Diard's trogon	<i>Harpactes diardii</i>	Single mle on Trus Madi.
Blue-banded kingfisher	<i>Alcedo euryzona</i>	Single individual on the stream below the camp at Trus Madi.
Collared kingfisher	<i>Todirhamphus chloris</i>	Recorded.
Blue-throated bee-eater	<i>Merops viridis</i>	Kota Kinabalu.
Red bearded bee-eater	<i>Nyctornis amictus</i>	Trus Madi - a regular feeding at the moth lights at dawn.
Wreathed hornbill	<i>Rhyticeros undulatus</i>	Trus Madi.
Rhinoceros hornbill	<i>Buceros rhinoceros</i>	Heard only on Trus Madi.
Gold-whiskered barbet	<i>Megalaima chysopogon</i>	Trus Madi.
Red-throated barbet	<i>Megalaima mystacophanus</i>	Trus Madi.

(Green broadbill)	<i>Calyptomena viridis</i>	Trus Madi.
Banded broadbill	<i>Eurylaimus javanicus</i>	Trus Madi.
Black-and-yellow broadbill	<i>Eurylaimus ochromalus</i>	Trus Madi.
Bornean banded pitta	<i>Hydrornis schwaneri</i>	Heard occasionally at Trus Madi.
(Black-and-crimson pitta)	<i>Pitta usherii</i>	Heard at Trus Madi.
Barn swallow	<i>Hirundo rustica</i>	Recorded.
Pacific swallow	<i>Hirundo tahitica</i>	Recorded.
Pied triller	<i>Lalage nigra</i>	Kota Kinabalu.
Scarlet minivet	<i>Pericrocotus speciosa</i>	Trus Madi.
Bar-winged flycatcher-shrike	<i>Hemipus picata</i>	Trus Madi.
Common iora	<i>Aegithina tiphia</i>	Trus Madi.
Bornean leafbird	<i>Chloropsis kinabaluensis</i>	Trus Madi.
Bornean bulbul	<i>Rubigula montis</i>	Trus Madi - but never for Phil...
Scaly-breasted bulbul	<i>Rubigula squamata</i>	Trus Madi.
Black-headed bulbul	<i>Pycnonotus atriceps</i>	Trus Madi.
Yellow-vented bulbul	<i>Pycnonotus goiavier</i>	Trus Madi.
Red-eyed bulbul	<i>Pycnonotus brunneus</i>	Trus Madi.
Cream-vented bulbul	<i>Pycnonotus simplex</i>	Trus Madi.
Penan bulbul	<i>Alophoixus ruficrissus</i>	Trus Madi.
Grey-cheeked bulbul	<i>Alophoixus tephrogenys</i>	Trus Madi.
Ashy drongo	<i>Dicrurus leucophaeus</i>	Trus Madi.
Greater racquet-tailed drongo	<i>Dicrurus paradiseus</i>	Trus Madi
Short-tailed magpie	<i>Cissa thalassina</i>	Gunung Alab.
Velvet-fronted nuthatch	<i>Sitta frontalis</i>	Trus Madi.
Mountain wren-babbler	<i>Napothera crassa</i>	Gunung Alab.
Grey-throated babbler	<i>Stachyris nigriceps</i>	Gunung Alab.
Bold-striped tit-babbler	<i>Mixornis bornensis</i>	Trus Madi.
Fluffy-backed tit-babbler	<i>Macronous ptilosus</i>	Trus Madi.
Sunda scimitar-babbler	<i>Pomatorhinus bornensis</i>	Trus Madi.
Chestnut-capped laughingthrush	<i>Garrulax mitratus</i>	Trus Madi and Gunung Alab.
Brown fulvetta	<i>Alcippe brunneicauda</i>	Trus Madi.
White-browed shrike-babbler	<i>Pteruthius aeralatus</i>	Gunung Alab.
Chestnut-crested yuhina	<i>Staphida everetti</i>	Trus Madi and Guning Alab.
White-bellied yuhina	<i>Yuhina xantholeuca</i>	Trus Madi and Gunung Alab.
White-browed shortwing	<i>Brachypteryx montana</i>	Gunung Alab.
Magpie robin	<i>Copsychus saularis</i>	Recorded.
White-browed shama	<i>Copsychus stricklandi</i>	Recorded.
Yellow-breasted warbler	<i>Phylloscopus montis</i>	Trus Madi.
Dark-necked tailorbird	<i>Orthotomus atrogularis</i>	Trus Madi.
Ashy tailorbird	<i>Orthotomus ruficeps</i>	Trus Madi.
Eye-browed thrush	<i>Turdus obscurus</i>	Small flocks noted on Trus Madi.
Asian brown flycatcher	<i>Musciapa latirostris</i>	Recorded.
Ferruginous flycatcher	<i>Musciapa ferruginea</i>	Single at Trus Madi.
Blue-and-white/Zappey's flycatcher	<i>Cyanoptila sp.</i>	Trus Madi.
Verditer flycatcher	<i>Eumyias thalassinus</i>	Trus Madi.
Narcissus flycatcher	<i>Ficedula narcissina</i>	Single on Trus Madi.
Spotted fantail	<i>Rhipidura perlata</i>	Kota Kinabalu.

Pied fantail	<i>Rhipidura javanica</i>	Trus Madi.
Black-naped monarch	<i>Hypothymis azurea</i>	Trus Madi.
White-breasted wood-swallow	<i>Artamus leucorhynchus</i>	Kota Kinabalu.
Grey wagtail	<i>Motacilla cinerea</i>	Trus Madi.
Asian glossy starling	<i>Aplonis panayensis</i>	Kota Kinabalu.
Plain-throated sunbird	<i>Anthreptes malacensis</i>	Kota Kinabalu.
Ornate sunbird	<i>Cinnyris ornatus</i>	Kota Kinabalu.
Temminck's sunbird	<i>Aethopyga temminckii</i>	Trus Madi.
Yellow-rumped flowerpecker	<i>Prionochilus xanthopygius</i>	Trus Madi.
Orange-bellied flowerpecker	<i>Dicaeum trigonostigma</i>	Trus Madi.
Pygmy heleaia	<i>Heleia squamifrons</i>	Trus Madi.
